

# New Mexico Ranges Are Restocked

Long Horns From Below the Border Replace High Grade Stock.

Carlsbad, N. M., Feb. 22.—Sam B. Smith has received the last consignment of Mexican cattle from the border, and turned them loose. The cattle came by way of El Paso, crossing the border near Columbus, and are the regular long horned variety, that once populated the Pecos county ranges. Smith has sold his high blooded stuff for fancy prices during the last year of high prices, and is now doing as many other El Paso county cattlemen, filling his range with Mexican grades. The last consignment comprised 13 cars, Smith having previously received nearly 1000 head. The long horns are being moved to the Smith ranges west and southwest of town by the Smith riders and are expected to be used to the watering places in a short time. Great numbers of Mexican cattle have been turned loose on the ranges tributary to Carlsbad during the last winter, several commission men having made neat sums handling the foreign stuff.

## DRY MURKIN INSTEAD OF BLACKLEG KILLS CATTLE

Roswell, N. M., Feb. 22.—That a disease known as dry murkine is killing off cattle in Chaves county, while the stockmen have been treated for blackleg, is the statement made by Charles C. Tamehill, a large cattleman. According to Mr. Tamehill, Robert Sower made the discovery of the dry murkine disease, following the death of a valuable steer on the Sower ranch. He had the steer cut open and found that it had not died of blackleg as supposed, but of dry murkine. After the first steer died, a score of others took sick and several died, nearly all of them by the use of a black draught and in the later stages by the injection of about six gallons of warm, soapy water.

## THROAT Troubles ARE Dangerous

because the swollen glands and inflamed membranes often affect other tissues and impair their healthy action. Scott's Emulsion stands alone as nature's corrector of throat troubles; its cod liver oil is specially converted into germ-repelling tissue—the glycerine is curative and healing, while the combined emulsion up-builds the forces to avert the weakening influence which always follow throat troubles. SCOTT'S EMULSION is best for three important reasons—1. It relieves the trouble; 2. It prevents a relapse; 3. It is not charged with alcohol or stupefying drugs. Shun substitutes and insist on Scott's.

## MOTHER! IF CHILD'S TONGUE IS COATED

It means, feverish, constipated, bilious, stomach sour, give "California Syrup of Figs."

A laxative today saves a sick child tomorrow. Children simply will not take the time from play to empty their bowels, which become clogged up with waste, liver, bile, indigestion, stomach sour. Look at the tongue, mother! If coated, or your child is listless, cross, feverish, breath bad, restless, doesn't eat heartily, full of cold or has sore throat or any other children's ailment, give a teaspoonful of "California Syrup of Figs." Then don't worry, because it is perfectly harmless. In a few hours all this constipation poison, sour bile and fermenting waste will gently move out of the bowels, and you have a well, healthy child again. A thorough "inside cleansing" is often all that is necessary. It should be the first treatment given in any sickness. Beware of counterfeit fig syrups. Ask your druggist for a 50-cent bottle of "California Syrup of Figs." It has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. Look carefully and see that it is made by the "California Fig Syrup Company." Don't be fooled!—Advertisement.

## SHEEPMEN INVEST \$90,000 IN LAND

Roswell Firm Buys 30,000 Acres Near Corona, N. M.

Corona, N. M., Feb. 22.—Since the recent ruling that government land may be purchased outright by stockmen, much activity in land sales has occurred in the Corona section, the biggest single transaction yet to take place being the purchase by the White & Pruet Sheep company of Roswell of a tract of 30,000 acres of land lying between the company's two ranches near Corona. The price paid for the land was \$90,000, or \$3 per acre. A. S. McCann purchased 4000 acres lying next to his cattle ranch about 25 miles from Corona. Joe Williamson purchased 4000 acres near his cattle ranch. David Gallegos and other stockmen are buying and leasing grazing land for their stock. It is reported that thousands of acres of grazing land between here and Roswell have been purchased by T. C. Thompson which will be used for grazing sheep. Ed Aughney, who is employed by the Santa Fe, is here visiting Mrs. Aughney and proving up on his ranch near Corona.

## BISBEE LIVESTOCK MEN WORK OVER EXPORT TAX

Bisbee, Ariz., Feb. 22.—Bisbee livestock men feel grave concern over the export tax on cattle imposed by the rebels, and are wondering whether cattle under contract, now on route to the border, will be subject to the tax. Immediate protest was made by the cattle owners to the Sonora government as soon as notification of the tax was received. No answer to the protests has been received. Cattlemen assert that the payment of the duty will mean ruin to many owners of Mexican stock who have tied up the savings of a lifetime in the herds, and would have to pay far more to get them across the line than they would receive from the purchasers.
